UI & TEUC	151,217	142,221					\$33,224,339	\$31,350,194				

Idaho has had little variation in unemployment payments for the past three weeks. The unemployment data point to a strong labor economy with activity lower than any recent year. When the state has a labor force that has increased, while unemployment activity has decreased, the picture of economic growth is especially strong.
